CAREER OBJECTIVE

Computer Science undergraduate specializing in Cybersecurity, with hands-on experience in Python, full-stack development, and problem-solving. Seeking internship or entry-level opportunities to build secure, scalable software while contributing to innovative projects and continuously enhancing my technical skills.

EDUCATION

Graphic Era Hill University, Dehradun <i>B.Tech in Computer Science & Engineering (Cybersecurity) CGPA: 7.32 / 10</i>	2023 – 2027
D.A.V Public School, Kotdwara <i>Class XII (Science) CGPA: 7.0 / 10</i>	2022 – 2023

EXPERIENCE

Cybersecurity Intern – Amroha Police (APCSIP-2026) <i>Amroha, Uttar Pradesh, India</i>	Jun 2026 <i>On-site</i>
- Completed the Amroha Police Cyber Security Internship Program (APCSIP-2026), gaining practical exposure to cybercrime investigation and digital forensics. - Performed practical investigations across 4 cybersecurity domains: Digital Forensics, OSINT, Dark Web Investigation, and cybercrime analysis through hands-on case studies. - Gained hands-on experience in Mobile Security, Network Security, Cyber Laws, and UPI fraud investigation — building an analytical, evidence-driven approach directly transferable to fault detection and anomaly analysis in AI/ML systems. - Collaborated with 10+ cybersecurity professionals and law enforcement officers during forensic analysis, cybercrime investigation exercises, and technical workshops.	
AI-Assisted Full Stack Web Development Intern <i>Technology Business Incubator (TBI), Graphic Era Deemed to be University GitHub Live</i>	Jun 2026 – Present <i>Hybrid</i>
- Developing AI-assisted full-stack web applications using React.js, Flask/Node.js, and REST APIs, working directly with AI-based development tools and workflows. - Building scalable application modules by applying object-oriented programming and data structures — core skills for designing ML pipelines and data-driven systems. - Collaborating with mentors using Git/GitHub and agile development practices, translating requirements into working technical solutions.	

PROJECTS

SecureCC: Secure Compiler Environment <i>Python, FastAPI, React, GCC GitHub</i>
- Architected a secure compiler environment that detects 5+ common C security vulnerabilities during compilation, using static analysis techniques applicable to automated fault/defect detection. - Implemented static analysis to detect 5+ vulnerability categories, including buffer overflows, command injection, and format string flaws. - Built a web-based IDE integrating 3 core technologies (React, FastAPI, Monaco Editor) for real-time secure coding feedback.
Inventory: Supply Chain Management System <i>Flask, MongoDB, AWS GitHub</i>
- Applied object-oriented design and efficient data structures to develop a scalable inventory and supplier management system — directly relevant to inventory optimization and logistics use cases. - Implemented secure REST APIs, optimized database queries, and developed inventory tracking and delivery optimization logic to improve operational efficiency.

TECHNICAL SKILLS

Programming: Python, Java, C, C++, JavaScript, HTML, CSS
Core CS Foundations: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
Frameworks: React.js, Flask, FastAPI
Databases: MongoDB, MySQL, SQLite
Cloud & Tools: AWS, Git, GitHub, Render, Netlify
Security Analysis: Digital Forensics, OSINT, Static Vulnerability Analysis, Ethical Hacking

CERTIFICATIONS & ACHIEVEMENTS

- IBM Front-End and Web Development Certification — Aug 2024
- AWS Cloud Practitioner / AWS Cloud Essentials — Nov 2025
- Cisco Ethical Hacker Certification — Dec 2025
- Ranked Top 1000 of 200,000+ teams in Adobe Hackathon 2025; Top 42 of 400+ in AWS Jam Event 2025; solved 150+ DSA problems on LeetCode.
